3DR	All Services	3DR, having built the world's premier aerial analytics platform, has again focused on hardware. Having signed a CRADA with the Department of Defense, 3DR today is focused on selling and developing secure UAV hardware solutions for Government and other security-minded customers, and working with companies interested in understanding the regulatory landscape of sUASs and Type Certification.	<a href="https://3drobotics.com/">https://3drobotics.com/</a>
Aerial Media Pros	Solutions	We equip industry leaders with complete UAV systems that save time, guide decisions & reduce risk.	<a href="https://www.aerialmediapros.com/">https://www.aerialmediapros.com/</a>
AeroVironment	Military	At AeroVironment, our purpose is to secure lives and advance sustainability through transformative innovation. Our solutions give our customers a fresh vantage point, positioning them to see the world with new eyes and extending their reach beyond the line of sight. That is the power of our breakthrough unmanned aircraft systems, perfected and refined over a half century. Whether they are warfighters searching for an enemy, border patrol agents searching for people in need of assistance, or telecom providers linking millions to the digital economy, our customers choose AeroVironment because our systems generate actionable intelligence reliably, creating a path to goals that would otherwise be unattainable.	<a href="https://www.avinc.com/">https://www.avinc.com/</a>
AgEagle	Mapping	We Manufacture and Assemble Commercial Drone Technologies for All Industries. AgEagle and our wholly owned subsidiaries, MicaSense, Measure and senseFly, are actively engaged in designing and delivering best-in-class drones, sensors and software that solve important problems for our customers.	<a href="https://ageagle.com/">https://ageagle.com/</a>
Agisoft	Mapping Software	Agisoft is proud to be among the pioneers of digital photogrammetry solutions developers. With Agisoft Metashape currently being highly competitive photogrammetric software on the market, we see our mission as continuous R&D work to incorporate high-end technologies into the software for the users to have a tool to successfully solve 3D reconstruction, visualization, surveying and mapping tasks.	<a href="https://www.agisoft.com/">https://www.agisoft.com/</a>
Agribotix	Agriculture	Agribotix provides fully supported, easy-to-use drone-enabled technologies and services, purpose-built for precision agriculture. Our singular focus on agriculture, coupled with responsive customer service and a culture of innovation, makes Agribotix the ideal strategic partner. Agribotix processes and analyzes agricultural data gathered by drones. This agricultural intelligence is applied to increase yields and maximize the bottom line while reducing the environmental footprint. All Agribotix solutions include FarmLens™, the leading cloud-based data analysis and reporting solution for people using drones in agriculture. Outputs include prescription maps for in-season fertilization, weed reports for geolocating resistant patches and estimating coverage, and specialized reporting.	<a href="https://agribotix.com/">https://agribotix.com/</a>
CropQuest	Agriculture	We are an innovation-driven leader in crop consulting and agricultural production management and solutions with a clear focus on our customers' production goals and budgets. Crop Quest has a network of professional agronomists and technical support staffs throughout the High Plains region from Texas to Nebraska and Colorado to Missouri. This extensive network of agronomists and operations support means we can continually provide our customers with local expertise on a truly national scale. We are focused on fueling continual growth by researching and implementing production solutions to truly benefit our agricultural customers.	<a href="https://www.cropquest.com/">https://www.cropquest.com/</a>
Delair	Equipment	Delair is the leading international provider of high performance drone-based solutions, enabling companies and governments to achieve their specific drone project objectives by working with our team of professional pilots, engineers, and worldwide support centers. With over a decade of experience in designing and manufacturing several generations of professional drones – including the world's first commercially certified BVLOS drone – Delair is uniquely positioned to assist industry, military and security verticals adopt drone technology. Our offer ranges from deploying Delair UAV technology, executing technical studies, and developing drone systems and subsystems. Headquartered in Toulouse, France, Delair retains full control over the entire production chain to ensure product quality.	<a href="https://delair.aero/">https://delair.aero/</a>
DJI	All Equipment / Software	Our platforms empower them to capture images that were once out of reach. Our flying and camera stabilization systems redefine camera placement and motion. Amazing photos and video, treasured personal memories, and high-end professional imagery are captured every day, in every corner of the world using DJI products. We do this through an unparalleled commitment to R&D, a culture of constant innovation and curiosity, and a focus on transforming complex technology into easy-to-use devices. Building on the ethos of "form follows function," our products combine advanced technology with dynamic designs.	<a href="https://www.dji.com/">https://www.dji.com/</a>
DOT Product	Mapping Equipment/Software	DotProduct develops high performance, easy-to-use solutions for capturing 3D spatial data and documentation of the built and existing world. Our technology is designed for mobile professionals who need high-quality 3D data, instantly. Our Dot3D software integrates with low cost, off the shelf, 3D sensors and turns Android and Windows tablets into a 3D-capture and processing solutions that deliver results before you leave the work site. Dot3D captures and registers 3D spatial data using only the processing power of a tablet or phone -- no desktop or laptop or cloud required! Simplify, augment or even replace laser scanning and photogrammetry based work processes you use today with a DotProduct powered tablet.	<a href="https://www.dotproduct3d.com/">https://www.dotproduct3d.com/</a>
Draganfly	All Services	The Trusted Name in UAV Hardware, Software, Sensors & Services. For more than two decades, Draganfly has been a leader in the professional drone industry, supporting our clients with enterprise drone solutions, contract engineering services, custom software, professional UAV services, and more.	<a href="https://draganfly.com/">https://draganfly.com/</a>
Field of View	Mapping	At Field of View, we are committed to developing aerial imaging products that are reliable and easy to use. We want you to succeed in your aerial mapping, modeling, and inspection missions. To do so, you need accurate GPS data for every image captured and a reliable way to trigger your camera. When you purchase a Field of View GeoSnap system, you can be assured that this geotagging and triggering problem is solved and that you no longer need to worry about complex integrations or in-field failures.	<a href="https://www.fieldofviewlc.com/">https://www.fieldofviewlc.com/</a>

Hoverfly	Mapping	Hoverfly Technologies is revolutionizing the government and commercial markets for long-duration, small footprint aerial surveillance and secure long-range communications with tethered technology. Power for LiveSky is supplied up the tether from a grid, vehicle, vessel, or generator source, allowing it to fly for an extended duration. By enabling continuous power and high-bandwidth data through a thin tether link, our drones can remain on-station in the air almost indefinitely, providing surveillance, targeting, and communications relay functions, while stationary or on-the-move, from vehicles or vessels.	<a href="https://www.hoverflytech.com/">https://www.hoverflytech.com/</a>
Kespry	Mapping	Kespry's drone-based aerial intelligence platform enables enterprises to transform how they capture, analyze and share insights about their business, providing the information needed to accelerate their operations. Purpose-built for industrial use, Kespry's platform delivers the data needed to close claims faster, measure stockpiles, survey mines more accurately, and operate earthworks projects more efficiently, all while being simple enough for any user.	<a href="https://kespry.com/">https://kespry.com/</a>
Lehman Aviation	Equipment	We are dedicated to offering the most advanced and easy to operate fixed-wing systems to meet the needs of our customers, for Surveillance, Reconnaissance and Logistic missions.	<a href="https://lehmannaviation.com/">https://lehmannaviation.com/</a>
Lockheed Martin	Military & Innovation	Helping the future arrive is what we do. We solve the great problems of our times. We create the innovative technologies that define eras. While no one knows what's going to change the world next, we're probably already working on it. As a global security, innovation, and aerospace company, the majority of Lockheed Martin's business is with the U.S. Department of Defense and U.S. federal government agencies. In addition, Sikorsky (a Lockheed Martin Company) provides military and rotary-wing aircraft to all five branches of the U.S. armed forces along with military services and commercial operators in 40 nations. The remaining portion of Lockheed Martin's business is comprised of international government and commercial sales of products, services and platforms.	<a href="https://www.lockheedmartin.com/en-us/index.html">https://www.lockheedmartin.com/en-us/index.html</a>
Pix4D	Software	Pix4D is a market leader in photogrammetry software technology. Our products enable you to digitize reality and measure from images taken from planes, drones, phones, or any other camera. We revolutionize photogrammetry, so you can scale up and unleash the power of your imagery.	<a href="https://www.pix4d.com/">https://www.pix4d.com/</a>
Precision Hawk	Software	PrecisionHawk is dedicated to empowering enterprises with actionable intelligence about their physical assets.	<a href="https://www.precisionhawk.com/">https://www.precisionhawk.com/</a>
Propeller	Mapping Equipment/Software	A turnkey 3D drone mapping and data analytics solution for civil construction and earthworks operations.	<a href="https://www.propelleraero.com/">https://www.propelleraero.com/</a>
SenseFly	All Services (Subsidiary)	An AgEagle Company. Our proven drone solutions simplify the collection and analysis of geospatial data, allowing professionals in surveying, agriculture, engineering and humanitarian aid to make better decisions, faster.	<a href="https://www.sensefly.com/">https://www.sensefly.com/</a>
Sentera	Agriculture	We deliver time-sensitive agricultural insights that optimize decisions and improve outcomes. Designing Technology That Drives Agronomic Value Technological advances in agronomic tools and data gathering provide unprecedented access to real time information that can better guide in-season decision making. Farming is becoming more precise and despite varying needs across a fragmented supply chain, industry professionals can use agronomic technology and insights to collaborate in new and innovative ways.	<a href="https://sentera.com/">https://sentera.com/</a>
Teledyne	All Equipment & Services	Teledyne FLIR designs, develops, manufactures, markets, and distributes technologies that enhance perception and awareness. We bring innovative sensing solutions into daily life through our thermal imaging, visible-light imaging, video analytics, measurement and diagnostic, and advanced threat detection systems. Teledyne FLIR offers a diversified portfolio that serves a number of applications in government & defense, industrial, and commercial markets. Our products help first responders and military personnel protect and save lives, promote efficiency within the trades, and innovate consumer-facing technologies. Teledyne FLIR strives to strengthen public safety and well-being, increase energy and time efficiency, and contribute to healthy and intelligent communities.	<a href="https://www.flir.com/">https://www.flir.com/</a>
Trimble	All Equipment & Services	Trimble is an industrial technology company, concentrated on helping the world work, better. Our technology enables jobs to get done more precisely and accurately so you can build, construct, grow and move the things we need to live our lives and build future communities.	<a href="https://www.trimble.com/en">https://www.trimble.com/en</a>
Volansi	Drone Delivery	Volansi is developing infrastructure-independent drones that can take off and land vertically, also known as VTOL (Vertical Take-off and Landing). We see a world where aerial drone delivery will expedite access to critical parts and humanitarian aid in remote locations that were once inaccessible. Our VTOL drones and logistical services make it possible for every industry to deliver anything, anywhere.	<a href="https://volansi.com/">https://volansi.com/</a>
Datamate	Construction	Datamate develops innovative solutions for the construction industry. As a trusted partner for companies committed to digital transformation and empowering their employees, Datamate offers software and services that utilize big data analytics, AI & machine learning, state-of-the-art computer vision, and drone and camera technologies. DatuBIM, our construction data analytics platform, was built for and with construction professionals. It revolutionizes traditional core processes of infrastructure construction project management and facilitates digitalization of the entire asset lifecycle from planning through execution and maintenance.	<a href="https://www.datamate.com/">https://www.datamate.com/</a>
Sky Drones	Equipment	The Most Advanced AI Drone Avionics Platform for Enterprise. - SKY-DRONES TECHNOLOGIES LTD creates professional full stack UAV avionics solutions (hardware and software) including flight control, ground control and communication systems as well as a cloud based management platform. The company helps its global customers to build and operate drones for security and commercial applications. Sky-Drones has an outstanding background in research and development, as well as manufacturing and delivering products and solutions for the future UAV market.	<a href="https://sky-drones.com/">https://sky-drones.com/</a>

Skyward	All Equipment & Services	At Skyward, we are passionate about the power of drones to transform the way companies do business. We believe we've only just begun to see their potential. Our customers are multinational corporations, small engineering firms, and companies in every industry, and we are continually inspired by the work they do. We are committed to help them see clearly, act intelligently, and fly with confidence through software and consulting services designed to power safety, efficiency, and access to airspace.	<a href="https://skyward.io/">https://skyward.io/</a>
Kespry	Software	Kespry's drone-based aerial intelligence platform enables enterprises to transform how they capture, analyze and share insights about their business, providing the information needed to accelerate their operations. Purpose-built for industrial use, Kespry's platform delivers the data needed to close claims faster, measure stockpiles, survey mines more accurately, and operate earthworks projects more efficiently, all while being simple enough for any user.	<a href="https://kespry.com/">https://kespry.com/</a>
Microdrones	All Equipment & Services	In 2022 and beyond, Microdrones will continue to offer best-in-class R&D, manufacturing, software, sales, service, and support to transform customer needs into effective, efficient, end-to-end systems for professionals.	<a href="https://www.microdrones.com/en/">https://www.microdrones.com/en/</a>
IATEC Plant Solutions	Global Enterprise Solutions	IATEC Plant Solutions is a global company that provides integrated technological solutions and asset information management services for the E&C, ENERGY, OIL&GAS, MANUFACTURE, AGRICULTURE, ENVIRONMENTAL and PUBLIC sectors. IATEC Plant Solutions was founded in 2000 and in the last 21 years has helped ENTERPRISE clients all around the world to succeed in their projects and daily operations. Its cost-efficiency mindset allied to a deep engineering and information management knowledge, result of its hands-on approach and long-term relationships with clients and partners, stand out IATEC Plant Solutions in the ENTERPRISE technological market.	<a href="https://www.iatecps.com/">https://www.iatecps.com/</a>
